BEYONDTECH CASE COMPETITION 2026

Problem Statement

Go-to-market strategy to scale a career accelerator: DTU penetration and pan-India Tier-1 expansion

At a glance	Summary
Company	BeyondTech, a non-tech placement accelerator for Tier-1 B.Tech students
Task	Build a GTM strategy for two pillars: DTU penetration and pan-India Tier-1 expansion
Format	8-12 slide deck (PDF or PPTX), excluding title and appendix slides
Proof point	BeyondTech members secured 40 selections across 14 organisations in the current DTU placement season so far, along with numerous selections at NSUT, BIT Mesra and Thapar

1. Company Background

BeyondTech helps Tier-1 B.Tech students crack the non-tech companies that visit their campus placements, across consulting, product, analytics and business profiles. Instead of preparing for each profile separately, students prepare for all of them under one course.

The company was started by its founder, Harsh, after he went through the "placement chaos" himself: random guides, scattered tutorials and no clear path. In a sense, a student prepares for placements their whole life. They work hard to get into a good college largely because they want a good placement at the end of it. Yet placement prep is often treated as something that can be done in two or three months, and it can't. Many students don't prepare in a structured way and get rejected in some of the best interviews of their lives, opportunities that may come just once in their undergraduate years.

BeyondTech exists to give students that structure for non-tech placements. Harsh is the founder and lead mentor, with Subham as a feedback mentor.

This year's results

Results this placement season have been strong across the four colleges where BeyondTech's core student audience comes from:

College	Selections	Companies (examples)
DTU	50+ so far; average package of 13-14 LPA (one of the highest), highest of 47 LPA at Eternal	Eternal, JP Morgan Chase, Bain, ZS, Everest, PwC and more
NSUT	Multiple selections	Eternal, ZS, Bain, Prism, L.E.K. Consulting and more
Thapar and BIT	Multiple selections	Bain, ZS, Deloitte and more

College	Selections	Companies (examples)
Mesra		

The offering

The flagship is a mentor-led "Non-Tech Placement Mastery Program". The brief describes it as an 11-week live and recorded bootcamp in four phases:

Phase	Focus	Content
1. Consulting foundations	Problem solving	Guesstimates, case frameworks, profitability and market entry
2. Analytics mastery	Data skills	SQL (basic, intermediate, advanced) and data cases
3. Product strategy	Product thinking	Product cases, RCA, KPIs and design
4. Personalized prep	Interview readiness	1-on-1 mock interviews, off-campus guidance and off-campus referrals

The site also lists company-specific previous-year questions (aptitude and interview) and weekly mocks with leaderboards. Beyond campus placements, BeyondTech also provides off-campus guidance, including off-campus referrals.

Traction and positioning

- **Traction (2026 placement season):** at DTU, BeyondTech members have secured 50+ selections so far at firms such as Eternal, JP Morgan Chase, Bain, ZS, Everest and PwC, with an average package of 13-14 LPA and a highest of 47 LPA (Eternal). At NSUT, members were selected at Eternal, ZS, Bain, Prism and L.E.K. Consulting; at Thapar and BIT Mesra, at Bain, ZS and Deloitte.
- **Positioning today:** "One course for every non-tech company visiting your campus"
- **Growth engine:** word-of-mouth, community and founder-led mentorship, which is why DTU is so dense.

2. The Core Problem

BeyondTech has strong satisfaction and strong DTU brand recall, but its growth engine is informal and tied to the founder's presence. Two bottlenecks stand out:

- **TAM limitation.** "Non-tech skills for engineers" is a narrow audience, and not every campus gets strong non-tech companies in its placements. To grow, BeyondTech needs to expand into more Tier-1 colleges across India.
- **Channel dependency.** Marketing relies entirely on word-of-mouth, BeyondTech's WhatsApp communities, and LinkedIn (the company page and the founder's personal profile). There is no proper marketing engine: no repeatable paid marketing and no structured ambassador flywheel, so growth can't be scaled or forecast.

3. Scope: Two Pillars

This case asks you to think about two things: how BeyondTech deepens its penetration at DTU, and how it expands to Tier-1 colleges across India.

Vertical 1: Deepen DTU

DTU has a strong non-tech scene, and its non-tech placements are among the best of any engineering campus. BeyondTech already has strong brand recall here, but new students still come in mostly through referrals. How can BeyondTech grow its DTU student base significantly?

Ideas you may consider:

- **Low-cost distribution:** campus societies, department networks and the placement cell.
- **Paid channels:** targeted Instagram and LinkedIn ads, and campus influencers.
- **Urgency activations:** mock placement drives and case workshops that bring in high-intent students.

Deliverable: a GTM plan to increase BeyondTech's penetration at DTU, with a budget split between organic and paid channels.

Vertical 2: Pan-India Tier-1 Expansion

Outside its core campuses (DTU, NSUT, Thapar and BIT Mesra), almost no one knows BeyondTech. Which Tier-1 colleges should it launch at next, and how?

- **Pick 3-4 colleges:** choose Tier-1 colleges with a strong non-tech culture, compared on a simple scorecard (for example, non-tech companies visiting campus, active non-tech societies and placement timeline). Public data and clearly stated estimates are fine, as long as every pick is backed by numbers.
- **Plan the launch:** how BeyondTech enters each college without a local founder or word-of-mouth, for example through campus ambassadors, society tie-ups, digital ads and alumni success stories.

Deliverable: your 3-4 college picks with a one-line reason for each, and a GTM plan to launch at them.

4. Deliverables and Scoring

A single PDF or PPTX of 8-12 slides, excluding title and appendix, covering:

- **DTU GTM plan** with a budget split between organic and paid.
- **Pan-India expansion GTM** with your 3-4 Tier-1 college picks, backed by data, and a plan to launch at them.

Evaluation criterion	Weight	Focus
DTU GTM plan	30%	Channel mix, budget split and how realistic the plan is
College selection	25%	Scorecard logic and numbers backing

Evaluation criterion	Weight	Focus
		each pick
Pan-India launch plan	25%	Entry approach and how it builds trust from scratch
Insight and creativity	10%	Understanding of students and fresh ideas
Presentation quality	10%	Clarity, structure and tone

ALL THE BEST!
