EUROGRIP × UNSTOP COLLABORATION

Case Study 1

Strengthening Brand Perception Across Consumer Segments — Commuter, Gig Worker & Premium

Background

Eurogrip is a leading two-wheeler tyre brand in India, competing across a wide spread of riders — from daily commuters to premium motorcycle owners to the fast-growing gig economy segment (delivery and ride-hailing riders). Brand perception varies across these groups, shaped by different needs: commuters value reliability and everyday usage, gig workers value durability and uptime, premium riders value performance and status.

Eurogrip already enjoys strong brand awareness. The opportunity ahead is to build on that foundation — strengthening top-of-mind recall and sharpening how that awareness converts into consideration and preference across each segment.

The Challenge

How should we build & strengthen Brand Eurogrip distinctly across Commuter, Gig Worker, and Premium segments — with messaging, channels, and activations tailored to each, while staying coherent as one brand?

Segment Insights

Commuter

- Eurogrip is a strong player here — seen as suitable for all types of applications (bikes) roads. Is known for having the widest range of tyres.

Premium

- This is the segment with the most room to grow. Premium riders weigh peer recommendation and performance heavily — a different mindset from commuters, who respond more to functionality.
- Building a stronger, more rounded impression — on performance, technology, and peer advocacy — is the key opportunity.

Gig Worker

- This segment is intentionally left fully open. Students are expected to research the gig-worker rider profile independently and build their own view of what this audience needs from a tyre brand.

Constraints

Budget	Assume 1.5%–2% of operating revenue as a realistic marketing budget benchmark.
Channel mix	Must span Digital, Retail, and On-ground — no single-channel strategies.
Brand coherence	Strategy must work as one coherent brand architecture, not as different / heterogenous approaches.

Format & Timeline

Round 1 — Executive Summary + Video Submission

- 1-page executive summary of the strategic approach.
- 2-minute video pitch — precise and direction-focused, not a polished production. The purpose is to convey clarity of thinking, not creativity or presentation quality at this stage.

Round 2 — Detailed Submission (1–2 weeks)

- A strategy deck of up to 15 slides (excluding annexures), covering: segment insights/personas, positioning per segment, channel-wise activation plan (Digital/Retail/On-ground), budget allocation, and sample creative/campaign ideas.

Evaluation Criteria

These criteria apply to the Round 2 submission and are meant to help judges score entries consistently.

Criterion	What we're looking for
Segment specificity	Does the strategy address Commuter, Gig Worker, and Premium distinctly — not one generic approach applied to all three?
Insight-grounding	Is the approach grounded in the brand insights (Provided & researched)
Channel realism	Is the Digital / Retail / On-ground mix realistic within the given budget guidance?
Differentiation	Is there a clear, distinctive idea — not just "do social media + billboards"?
Feasibility	Could Eurogrip actually execute this within a realistic timeframe and structure?
