EUROGRIP × UNSTOP COLLABORATION

Case Study 3

Accelerating Domestic Growth in the Off-Highway Tyre (OHT) Tractor Business

Background

Eurogrip's off-highway tyre (OHT) business serves a very different buyer than the two-wheeler business — farmers, fleet operators, and agricultural equipment dealers, with purchase decisions driven by durability, total cost of ownership, and trust built through dealer relationships rather than brand advertising.

India's tractor tyre market is large and growing, but highly fragmented, with strong regional dealer loyalties and price sensitivity that varies sharply by farm size and geography. This makes it a category where the right go-to-market and channel strategy matters as much as the product itself.

The Challenge

How should Eurogrip accelerate its domestic market share in the tractor tyre business — identifying the right customer segments, channel strategy, and value proposition to win share from entrenched competitors in a relationship-driven, low-brand-salience category?

What Students Will Need to Research

- The competitive landscape in Indian tractor/OHTs — key players, market shares, and how they position themselves. Define the current standing of Brand TVS EUROGRIP.
- Farmer and fleet-operator buying behaviour — how purchase decisions are actually made, and who influences them (dealers, mechanics, peers).
- Regional variation — tractor tyre needs likely differ across cropping patterns, terrain, and farm sizes across India.

Constraints

Budget	Assume 1.5%–2% of the relevant business-unit revenue as a realistic marketing/GTM budget benchmark.
Distribution model	Strategy must work within a dealer-led distribution model — this is not a direct-to-consumer or heavy-digital-advertising category.
Segment coverage	Must address at least two distinct customer segments (for example, smallholder farmers vs. larger fleet/commercial operators).

Format & Timeline

Round 1 — Executive Summary + Video Submission

- 1-page executive summary of the strategic approach.
- 2-minute video pitch — precise and direction-focused, not a polished production. The purpose is to convey clarity of thinking, not creativity or presentation quality at this stage.

Round 2 — Detailed Submission (1–2 weeks)

- A strategy deck of up to 15 slides (excluding annexures), covering: segment strategy, channel/dealer approach, value proposition, and budget allocation.

Evaluation Criteria

These criteria apply to the Round 2 submission and are meant to help judges score entries consistently.

Criterion	What we're looking for
Segment specificity	Does the strategy address distinct customer segments — not one generic farmer persona?
Channel realism	Is the dealer-channel strategy realistic for how this category actually buys and sells?
Insight-grounding	Does the approach show genuine insight into what drives OHT tyre purchase decisions?
Differentiation	Is there a clear point of difference from how competitors currently operate in this category?
Feasibility	Could this realistically be executed within the given budget and distribution constraints?
