Project DOBAARA: FAQs

MarKSoc DTU Case Competition 2026

These answers apply to every team. Nothing here adds to the case. If something is not answered here, the case document is the only source. We will not answer questions about whether a plan or an answer is right.

Submission and general rules

1. How many slides can our deck have?

Up to 8 main slides and up to 4 appendix slides. The cover slide and the thank you slide do not count towards either limit. The executive summary is a main slide and must be the first slide after the cover.

2. Where does the decision table go?

In the main slides, filled in for January, February and March, as described on page 7 of the case.

3. Can we attach an Excel file or add links to our working?

Only the PDF deck is assessed. Put any working the judges need to follow in the appendix slides.

4. Can we use outside data, such as real market sizes or real company figures?

No. Use only the numbers in the case document. The real world context on page 2 explains why the case is set where it is. Do not use it in your calculations.

5. Do slide design and visuals earn marks?

Slide design earns no marks on its own. Clear slides help the judges follow your reasoning, which does count.

6. Can we write our positioning line in Hindi or Hinglish?

Yes, as the case says in Question 2.

7. Something we need is not in the case. What should we do?

Make a sensible assumption and state it on the slide where you use it. Stated assumptions are rewarded. Hidden ones are not.

8. How should we round numbers?

Show company totals in ₹ lakh to one decimal place and per phone figures in rupees. Small rounding differences do not lose marks.

About the case document

9. Exhibit 1 says "More than one answer allowed". Is that a mistake? Do we have to give more than one answer?

It is not a mistake, and it does not refer to your deck. It describes the survey: each person could choose more than one answer, which is why the shares add up to more than 100%.

10. Are prices and costs before or after GST?

Before GST, as page 2 of the case says.

11. We have a question about how the options in Exhibit 6 work. Where do we look?

Everything you need is in Exhibit 6. We will not add detail beyond what the case says.

12. Can we use part of an option, for example only some of what B2 includes?

No. Use each option as Exhibit 6 describes it. You may suggest other ideas for after March, clearly labelled, but your January to March numbers must use the options as written.

Decision table and board tests

13. How do we calculate EBITDA and the return rate?

Use the definitions in Sana's second email on page 7 of the case.

14. Do we fill in all three months of the decision table?

Yes.

15. What does "compared with doing nothing" mean below the decision table?

The difference between your total EBITDA for January to March and the total Tikau would earn over the same three months if it made no changes.

16. Who decides whether our claims follow Exhibit 5?

The judges, using the rules in Exhibit 5.

17. Is there one correct plan?

No. A team that chooses a different plan from the judges can still win if its numbers are correct and its reasoning is stronger. We will not comment on whether any plan is right.

Final round

18. Can we change our deck for the final round?

No. Finalists present the exact PDF submitted on Unstop. Slides cannot be edited, added or reordered.

19. What happens after the presentation?

The judges ask questions. Any team member may be asked, including members who did not present.

If you have any further questions, message any of the admins.
