PROJECT DOBAARA

TIKAU PHONES, JANUARY TO MARCH 2027

A board recommendation: which options to fund from ₹80 lakh of growth money, which customer to win, how to launch in February and how to know by mid February that it is working

OUR ANSWER: CERTIFY EVERY PHONE, PROMISE 85% BATTERY AND 12 MONTHS, AND OPEN A THIRD LAB SHIFT ON 1 FEBRUARY, FOR FAMILY BUYERS

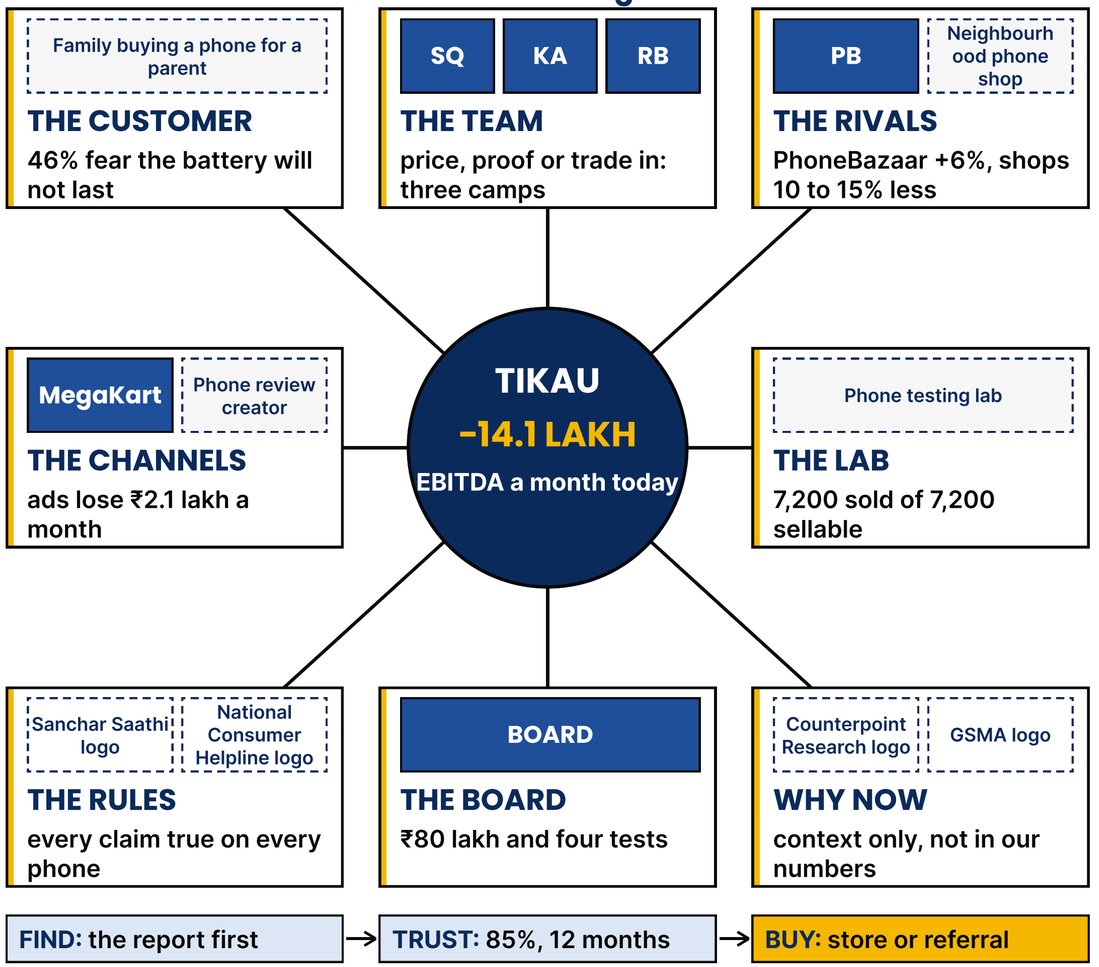

In our model March EBITDA moves from −₹14.1 lakh to +₹5.6 lakh and the return rate from 8.1% to 4.5%, for ₹58.0 lakh of the ₹80 lakh. All four board tests pass. No price cut, no trust campaign, and trade in waits for April.

Dayita Arora	Ramjas College, University of Delhi	Member

WHO DECIDES WHETHER A TIKAU PHONE GETS BOUGHT

One Noida lab, five channels, three grades: Tikau sells 7,200 phones a month and loses ₹14.1 lakh a month doing it.

Monograms mark the case's fictional names; logos mark real bodies the case names.

Source: case Exhibits 1 to 6 | team model 9b3628d94d | logos identify organisations named in the case; no partnership or endorsement is implied

Certify every phone, promise 85% battery and 12 months, and open a third lab shift on 1 February: March EBITDA moves from −₹14.1 lakh to +₹5.6 lakh

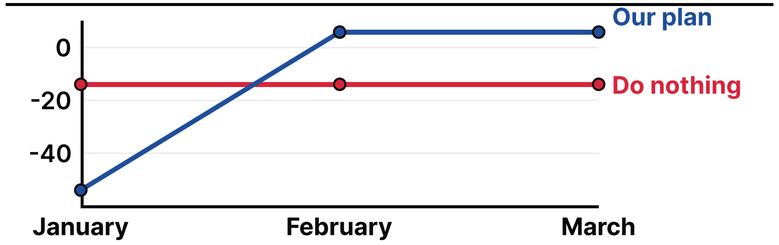

+19.7
₹ lakh a month better in March than doing nothing

58.0 of ₹80
growth money used: B1 ₹15, B2 ₹25, shift ₹9

4.5% returns
limit 6.0% in March

5 of 84 plans
pass all four tests; ours ends Q1 highest

MONTHLY EBITDA, ₹ LAKH

January carries ₹40 lakh of setup, so Q1 ends −₹0.5 lakh against doing nothing.

THE DECISION TABLE

₹ lakh	January	February	March
Options live	Setup only	B1, B2, shift	B1, B2, shift
Phones sold	7,200	8,328	8,328
Contribution	43.9	72.6	72.6
Growth money	40.0	9.0	9.0
EBITDA	−54.1	5.6	5.6
Return rate	8.1%	4.5%	4.5%

THE BOARD'S FOUR TESTS

	Limit	Ours	Result
1 Growth money	₹80 lakh	₹58.0	Pass
2 March EBITDA	₹0 or more	+5.6	Pass
3 March returns	6.0%	4.5%	Pass
4 Exhibit 5 claims	all true	3 made	Pass

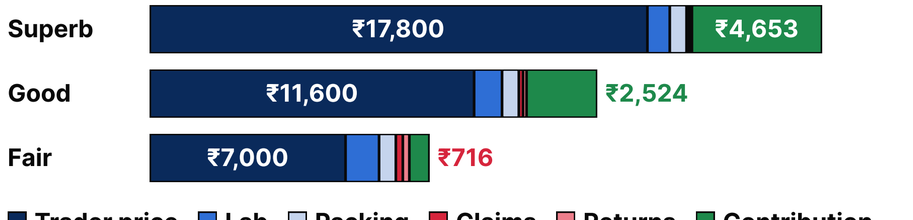

Test 4 needs B1: a battery claim needs Tikau's own lab reading.

Sana asks	The obvious answer	What we found, and what we do	Proof	Result
1 What holds Tikau back	Demand: cut prices and buy ads	Trust behind a full lab: 7,200 sold of 7,200 sellable; 5 of 7 lost-sale reasons are trust	Ads lose ₹2.1 lakh a month	EBITDA −₹14.1 lakh a month
2 Who to win	The biggest segment, or value seekers	Family buyers on Good phones: no supply cap, ₹2,699 a phone after the plan	A Fair phone earns ₹164 after B2	Har phone ki kundli. Saal bhar ki zimmedari.
3 What, and when	Price push (A), or every option at once	B1 and B2 set up in January, third shift from 1 February; no A, B3 or C before April	5 of 84 plans pass all tests	March EBITDA +₹5.6 lakh
4 How customers hear	Discount banners and countdown timers	The Tikau Report above the price on every page; stores, referrals, labelled creators	3 claims made, 2 refused	0 breaches of Exhibit 5
5 How we know	A monthly P&L review	Weekly orders, return rate and Good battery swaps, each with a trigger	Orders under 1,838 a week	April: trade in on new money

Source: case Exhibits 1 to 6 and page 7 | team model 9b3628d94d (T12 to T16) | every number is rebuilt on slides A1 and A2

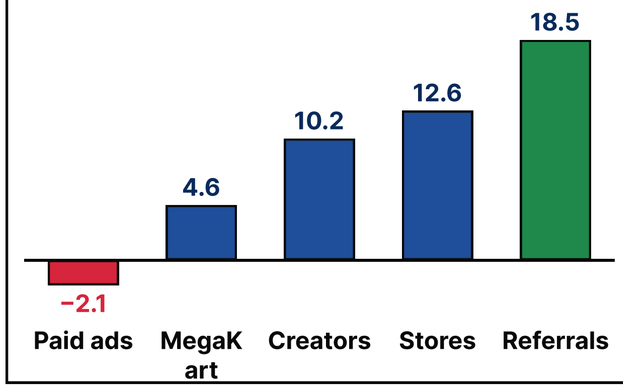

Every phone earns money before marketing, but Fair earns ₹716 to Superb's ₹4,653, ads lose ₹2.1 lakh a month and Tikau loses ₹14.1 lakh a month

ONE PHONE, ₹: WHERE THE SELLING PRICE GOES

Grade	Contribution	Share of price	Claims, returns
Superb	₹4,653	19.4%	₹147
Good	₹2,524	15.8%	₹276
Fair	₹716	7.2%	₹484

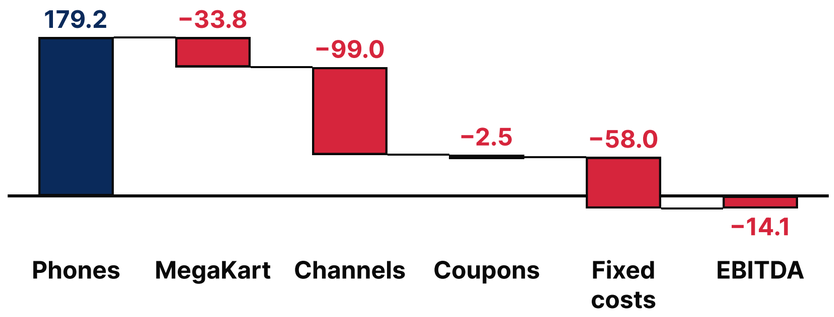

CONTRIBUTION AFTER MARKETING BY CHANNEL, ₹ LAKH A MONTH

Channel	Orders	Per order	Dashboard	True cost
Paid ads	2,600	−₹81	₹2,308	₹2,308
MegaKart	2,000	₹231	₹0	₹1,692
Creators	900	₹1,137	₹2,000	₹2,000
Stores	1,000	₹1,258	₹2,100	₹2,100
Referrals	700	₹2,648	₹350	₹350

The dashboard misleads: it shows MegaKart at ₹0 an order, but the 12% commission costs ₹1,692 an order and leaves ₹231. Ads look mid-priced and lose money.

THE MONTH TODAY, ₹ LAKH

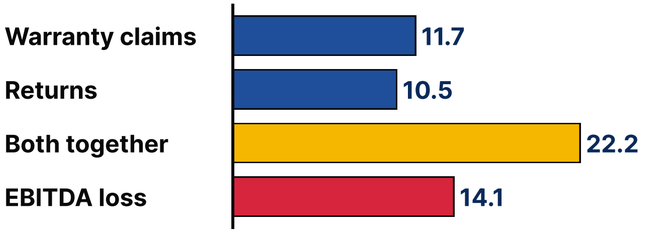

x 12 = −₹169.6 lakh, against the case's −₹170 lakh for the last twelve months.

RETURN RATE BY CHANNEL AND GRADE, %

	Superb	Good	Fair	Channel
Performance ads	4.0	7.0	13.0	8.8
MegaKart	4.0	7.0	13.0	9.4
Creators	6.0	10.5	19.5	9.6
Stores	2.0	3.5	6.5	3.1
Referrals	4.0	7.0	13.0	6.9

8.1% of phones come back within 7 days; the board's March limit is 6.0%

WHAT DISTRUST COSTS EACH MONTH, ₹ LAKH

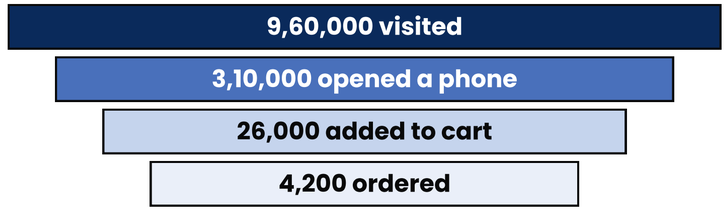

More than the loss: 468 claims and 582 returns a month cost ₹22.2 lakh. Repairs take 9 days and 38% of claims need a second visit.

Source: case Exhibits 2 and 3, page 3 | team model 9b3628d94d (T2 to T6) | dashboard cost per order as the growth team reports it: fixed spend plus coupons over orders

Tikau's problem is trust behind a full lab, not demand: 91.6% of product-page visitors leave, battery fear outranks price two to one and the lab sells every phone it can test

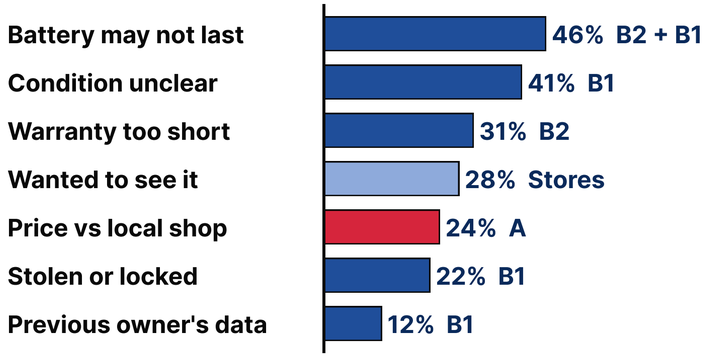

WEBSITE FUNNEL, OCTOBER 2026

91.6% leave the phone page without adding to cart

Step	People	Conv.
Visited	9,60,000	
Opened a page	3,10,000	32.3%
Added to cart	26,000	8.4%
Ordered	4,200	16.2%
Store pickup	n/a	33%

WHY 1,500 VISITORS DID NOT BUY, %

More than one answer allowed. Trust fills 5 of the 7 reasons; price comes fifth. The tag after each bar is the option that answers it.

WHAT WOULD MAKE THEM BUY, %

	Share	Fixed by
85% battery promise	44%	B2
12 month warranty	39%	B2
Photos, battery, IMEI	36%	B1
Old phone in part	31%	C
A price 5% lower	22%	A

Two to one: a battery promise draws 44% of those who left; a 5% price cut draws 22%.

DEMAND IS NOT THE LIMIT: THE LAB IS FULL

Lab: sellable phones a month

7,200 of 7,200

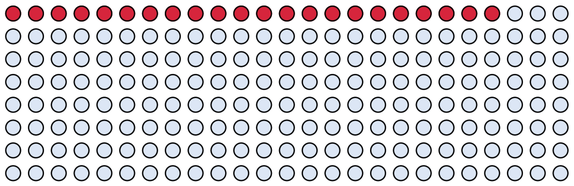

Superb phones from traders a month

1,775 of 2,000

8,000 tested, 10% fail, 7,200 sellable, all sold. Any extra order needs a third shift; without one the case's rule drops it.

BATTERY CLAIMS FAIL ON 11% OF GOOD

22 of 200 Good phones read below the 80% on their listing in Tikau's own November check: about 351 Good phones a month (A14). Exhibit 5 needs Tikau's own lab reading, so test 4 fails today.

FIVE WHYS TO ONE ROOT CAUSE

Why	Finding
1 Loss	claims and returns cost ₹22.2 lakh a month
2 Returns	buyers doubt battery (46%) and condition (41%)
3 Doubt	battery figures come from the trader's tool
4 Tool	the lab runs at 7,200 of 7,200, no spare time
5 Root	Tikau sells what it cannot yet prove

Source: case Exhibit 1 (1,500 visitors who left, October funnel), Exhibit 4 (lab, supply, November spot check), Exhibit 5 | team model 9b3628d94d (T7 to T9)

Win family buyers: they buy Good phones, which have no supply cap, and the battery and 12 month promise they ask for lifts a Good phone from ₹2,524 to ₹2,699

SEGMENT SCORECARD, 1 WEAK TO 5 STRONG

	Size	Margin	Headroom	Returns	Worry fit	Lever fit	Total
Flagship on a budget	5	5	1	5	3	3	22
Value seekers	4	1	5	1	1	1	13
Family buyers	3	3	5	3	5	5	24
Upgraders	2	4	3	4	2	1	16

Margin: contribution a phone after the plan. Headroom: Q1 supply left. Returns: grade return rate. Worry fit: share of their worry B1 and B2 fix. Lever fit: a passing option reaches them.

Family buyers: 21%; Good ₹2,699; no cap; Good 7%; who will fix it: 12 months (39%), battery (46%); B1 + B2.

Flagship buyers still get all 2,000 Superb phones a month; our plan rations 70 Superb orders.

THE FAMILY BUYER

Parent with a phone a child bought

Trait	Evidence
Who buys	21%, mostly Good phones
Wants	to know who will fix it
Top fear	Battery will not last, 46%
Second fear	Condition unclear, 41%
Buys at	Stores (1 in 3 buy) and referrals

In a customer's words: "Phone theek hai, par bharosa nahi hua." The phone is fine, but I never came to trust it.

ONE GOOD PHONE, TODAY TO OUR PLAN, ₹

Fair goes the other way: ₹716 today, ₹164 after the battery and the report. We do not chase value seekers.

POSITIONING

For families buying a phone for a parent or a child, who need it to last and need to know who will fix it, Tikau sells refurbished phones that each come with a lab report, battery health of 85% or more and a 12 month warranty, because every phone is tested and its battery read in Tikau's own lab.

Proof 1: battery read in our lab

Proof 2: IMEI checked, data wiped

Proof 3: 12 months, repaired by Tikau

THE LINE A CUSTOMER REMEMBERS

Har phone ki kundli.
Saal bhar ki zimmedari.

Every phone's full report. A year of responsibility. A kundli is the chart a family reads before a big decision.

Source: case Exhibit 1 (segments, reasons, offers), Exhibits 2, 4 and 6 | team model 9b3628d94d (T10, T11) | scores are team judgement on the case data named in each row

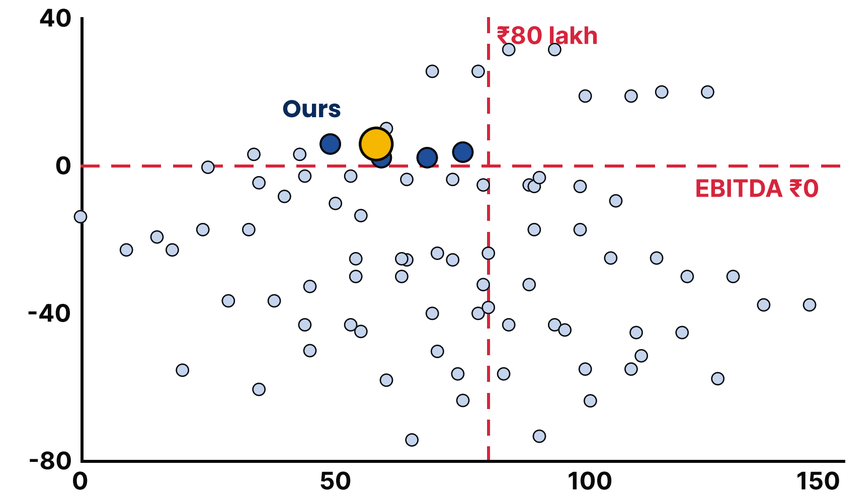

We ran all 84 plans the options allow: 5 pass the board's four tests, and only certify, battery and a February shift ends Q1 within ₹0.5 lakh of doing nothing

EACH CAMP'S PLAN AGAINST THE FOUR BOARD TESTS

	Growth money	Mar EBITDA	Q1 vs nothing	Mar returns	Test 1	Test 2	Test 3	Test 4
Do nothing	0.0	−14.1	0.0	8.1%	Pass	Fail	Fail	Fail
Rohan: price push (A)	20.0	−55.7	−83.2	8.9%	Pass	Fail	Fail	Fail
Rohan with a shift	38.0	−36.9	−45.6	8.9%	Pass	Fail	Fail	Fail
Kabir: B1 + B2, no shift	40.0	−8.6	−29.0	4.5%	Pass	Fail	Pass	Pass
Stores: trade in (C)	35.0	−4.9	−20.7	8.0%	Pass	Fail	Fail	Fail
B2 + shift, no report	43.0	2.8	+9.0	6.5%	Pass	Pass	Fail	Fail
All: B1, B2, C, shift	93.0	31.2	+5.9	4.5%	Fail	Pass	Pass	Pass
B1 + B2 + C, no shift	75.0	3.4	−44.4	4.5%	Pass	Pass	Pass	Pass
Ours: B1 + B2, Feb shift	58.0	5.6	−0.5	4.5%	Pass	Pass	Pass	Pass

Test 1: money up to ₹80 lakh. Test 2: March EBITDA ₹0 or more. Test 3: returns up to 6.0%. Test 4: Exhibit 5.

84 PLANS: MARCH EBITDA AND GROWTH MONEY

x: growth money, ₹ lakh. y: March EBITDA, ₹ lakh.

Fails a test | Passes all four | Our plan

CONCLUSIVELY: THE OBVIOUS ANSWERS FAIL

Rejected plan	The number that kills it	Verdict
Price push (A)	Fair falls to ₹416; March −₹55.7 lakh	Fails tests 2 to 4
Certify, no shift	1,198 orders a month miss the lab	Fails test 2 (−₹8.6 lakh)
Trade in now (C)	needs ₹93.0 lakh with B1, B2, shift	Fails test 1

THE FIVE PLANS THAT PASS, ₹ LAKH

Plan	Growth money	Mar EBITDA	Q1 vs nothing	Mar returns
B1 + B2 + shift from Feb	58.0	5.6	−0.5	4.5%
B1 + B2 + shift from Mar	49.0	5.6	−14.8	4.5%
B1 + C + shift from Feb	68.0	1.9	−26.6	5.6%
B1 + C + shift from Mar	59.0	1.9	−34.4	5.6%
B1 + B2 + C	75.0	3.4	−44.4	4.5%

The next best plan ends Q1 ₹14.2 lakh lower.

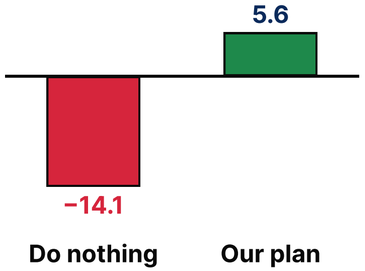

Source: case Exhibit 6 and page 7 | team model 9b3628d94d (T12 to T14) | test 4 needs B1 because a battery claim needs Tikau's own lab reading (Exhibit 5)

Our plan spends ₹58.0 lakh, passes all four tests and turns March EBITDA from -₹14.1 lakh to + ₹5.6 lakh: ₹19.7 lakh a month better than doing nothing

MARCH EBITDA, ₹ LAKH A MONTH

+19.7

₹ lakh a month better than doing nothing, from 1 February

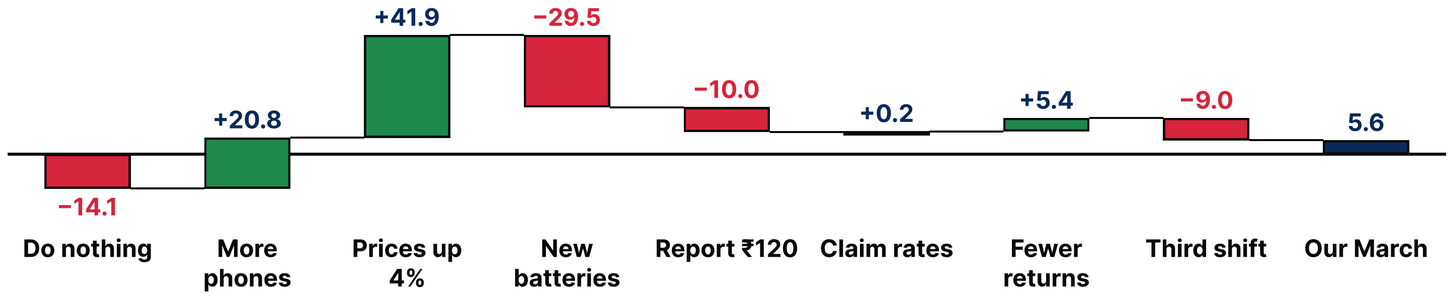

₹58.0 lakh	4.5%	8,328	93%
of ₹80 lakh used	returns; limit 6.0%	phones in March	of the 9,000 lab limit

THE DECISION TABLE (CASE PAGE 7)

Your plan	January	February	March
Options live	Setup paid	B1, B2, shift	B1, B2, shift
Phones sold	7,200	8,328	8,328
Contribution after marketing (₹ lakh)	43.9	72.6	72.6
Growth money spent (₹ lakh)	40.0	9.0	9.0
EBITDA (₹ lakh)	−54.1	5.6	5.6
Return rate	8.1%	4.5%	4.5%

₹58.0 lakh	Pass	+5.6	4.5%	Pass	-₹0.5 lakh
total growth money, Jan to Mar	Test 1: ₹80 lakh limit	Test 2: March EBITDA, ₹ lakh	Test 3: March returns, limit 6.0%	Test 4: three claims, all true	Q1 against doing nothing (−42.9 vs −42.4)

MARCH EBITDA, DOING NOTHING TO OUR PLAN, ₹ LAKH

WHAT TIKAU WILL NOT DO, AND WHY

Not this	Because
A price push	March −₹55.7 lakh; a Fair phone falls to ₹416
B3 campaign	₹15 lakh a month buys ₹3.9 lakh of contribution
Trade in now	with B1, B2 and the shift it needs ₹93.0 lakh
More ad money	ads already lose ₹2.1 lakh a month
Value seekers	a Fair phone earns ₹164 after B2

Source: team model 9b3628d94d (T15, T16); decision table format from case page 7 | EBITDA = contribution after marketing − ₹58 lakh fixed costs − growth money that month

The February launch puts the Tikau Report above the price on every product page and sells it through stores, referrals and labelled creators, with three claims true for every phone

WHAT A CUSTOMER SEES FIRST

Refurbished, Good grade, 128 GB

Real photo: Front | Real photo: Back | Real photo: Edges | Real photo: Screen on

TIKAU REPORT

- **Battery health:** 87%, read in Tikau's lab on 2 Feb 2027
- **Condition:** light marks on the back, all shown above
- **IMEI:** checked; not reported lost or stolen
- **Data:** wiped, certificate included
- **Warranty:** 12 months, repairs in Tikau's lab
- **Returns:** 7 days

₹16,640 12 month warranty included

ADD TO CART

Not on this page: countdown timers, "only 1 left" and struck-out prices.

THE MAIN IDEA

Har phone ki kundli. Saal bhar ki zimmedari.

Show the report before the price. Every channel carries the same report: the product page, the store counter, the creator's video and the referral link. In English: every phone's full report, a year of responsibility.

1 February: report live on every listing, MegaKart included

Week 1: stores read batteries in front of buyers

Week 2: creators open the report on camera, labelled as ads

CHANNELS IN FEBRUARY

Channel	Role in the launch	Per order now	Per order, Mar	Spend
Referrals	Family code shares the report; same ₹350 coupon	₹2,648	₹2,923	coupons only
Stores	Battery read at the counter; report in the box	₹1,258	₹1,881	₹21 lakh
Creators	Open the report on camera, labelled as an ad	₹1,137	₹1,769	₹18 lakh
Paid ads	Report-first creative; no new money	−₹81	₹231	₹60 lakh
MegaKart	Report and 12 months on listings; no ads	₹231	₹92	12% fee

THREE CLAIMS WE MAKE AND TWO WE DO NOT, AGAINST EXHIBIT 5

	True on every phone	Says refurbished	Allowed words	Proof we hold	Verdict
Battery 85% or more, read in our own lab	Yes	Yes	Yes	Yes	MAKE
12 month warranty on every phone	Yes	Yes	Yes	Yes	MAKE
IMEI checked and data wiped, with a certificate	Yes	Yes	Yes	Yes	MAKE
"As good as new, with genuine parts"	No	n/a	No	No	DO NOT
"Cheaper than PhoneBazaar for 12 months"	No	n/a	Yes	No	DO NOT

Source: case Exhibits 3, 5 and 6 | team model 9b3628d94d (T21) | the product page is an illustration: the battery reading shown is an example, not a measured phone

Three weekly numbers show by mid February whether March clears zero: orders above 1,838 a week, returns under 5.5% and fewer than half of Good phones needing a battery

1 ORDERS A WEEK

1,923 our plan, all channels

Change course at: 1,838 a week, two weeks running

Why: March EBITDA falls below ₹0: a 10.5% order rise instead of 16.6%

Then: check the report sits above the price on every listing; move store and referral effort to report demos

2 RETURN RATE

4.5% our plan, all channels

Change course at: 5.5% in any week

Why: the board's limit is 6.0%, reached only if B1 and B2 keep 74% of today's returns

Then: find the channel: creators return 1.5 times the website rate; retest batteries in that batch

3 GOOD PHONES NEEDING A BATTERY

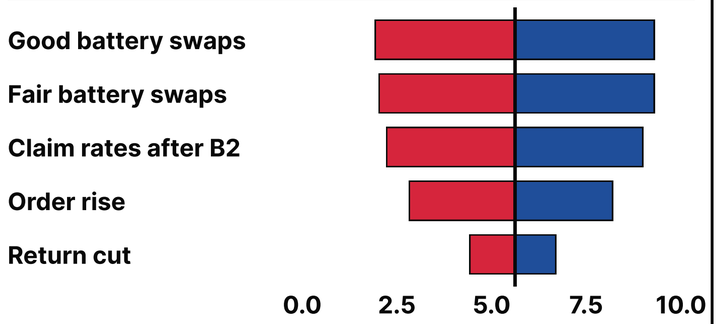

40% Exhibit 6, our plan

Change course at: 50% in any week

Why: March EBITDA falls to +₹1.9 lakh, and to zero at 55%

Then: read batteries at intake and buy weak-battery Good phones at a lower price

WHAT MOVES MARCH EBITDA, ₹ LAKH

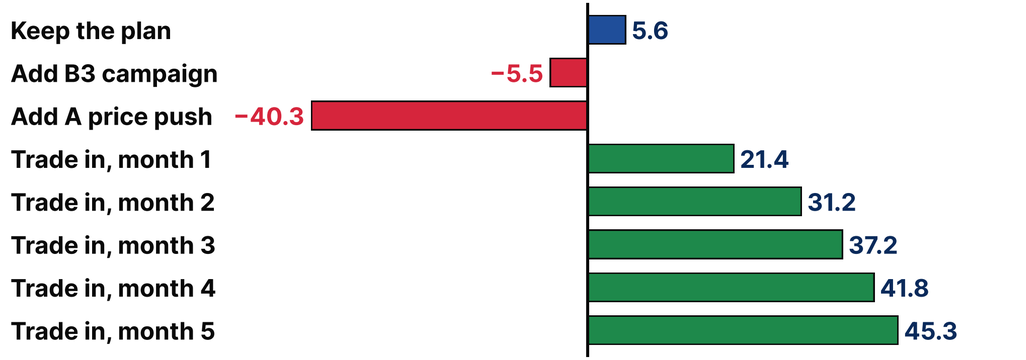

Red: the input 25% worse. Blue: 25% better. No single input takes March below zero; all five worse together give −8.7 ₹ lakh.

THREE SCENARIOS, ₹ LAKH

	Bear	Base	Bull
Feb EBITDA	−8.7	5.6	20.5
Mar EBITDA	−8.7	5.6	20.5
Q1 vs nothing	−29.2	−0.5	+29.2
Mar returns	5.3%	4.5%	3.8%
All tests	Fail	Pass	Pass

Bear: every uncertain effect 25% worse at once. The weekly numbers show it by the second week of February.

APRIL OPTIONS, EBITDA ₹ LAKH A MONTH

In April, on new growth money: launch C trade in (₹35 lakh setup, repaid in about 2.2 months); keep A and B3 off; keep the third shift.

Source: team model 9b3628d94d (T17 to T20) | weekly = monthly / 4.33 (A13) | stress tests move uncertain effects 25% (A16) | April assumes new growth money (A15)

A1. Every number on the main slides rebuilds from the case exhibits and twenty stated assumptions, and the model passes 13 of 13 checks

CONTRIBUTION PER PHONE, ₹ (EXHIBIT 2)

Line	Superb	Good	Fair
Average selling price	₹24,000	₹16,000	₹10,000
Price paid to the trader	−₹17,800	−₹11,600	−₹7,000
Testing and repair	−₹800	−₹1,000	−₹1,200
Packing, delivery, payment	−₹600	−₹600	−₹600
Claims: rate x ₹2,500	−₹75	−₹150	−₹250
Returns: rate x ₹1,800	−₹72	−₹126	−₹234
Contribution per phone	₹4,653	₹2,524	₹716

Formula: contribution = price − trader price − lab − ₹600 packing − claim rate x ₹2,500 − return rate x ₹1,800. A return does not reverse the sale (Exhibit 2).

CHANNEL WORKING, ₹ LAKH A MONTH (EXHIBIT 3)

Channel	Orders	Phones	Fee	Fixed	Coupons	After mkt	Returns
Paid ads	2,600	57.9	0.0	−60.0	0.0	−2.1	8.8%
MegaKart	2,000	38.5	−33.8	0.0	0.0	4.6	9.4%
Creators	900	28.2	0.0	−18.0	0.0	10.2	9.6%
Stores	1,000	33.6	0.0	−21.0	0.0	12.6	3.1%
Referrals	700	21.0	0.0	0.0	−2.4	18.5	6.9%
Total	7,200	179.2	−33.8	−99.0	−2.4	43.9	8.1%

Rule: each channel's phones use its own return rate (creators 1.5x, stores 0.5x), then lose fixed spend, MegaKart's 12% fee and ₹350 referral coupons. EBITDA = 43.9 − 58.0 = −14.1.

ASSUMPTIONS WE STATED, A01 TO A20 (EACH ALSO SITS ON THE SLIDE THAT USES IT)

ID	Assumption
A01	Lever A's ₹10 lakh counts once, as growth money, not in ads' fixed spend
A02	Every channel's fixed spend stays as today in every plan and month
A03	Commission, coupons and per-phone costs apply to delivered orders only
A04	Rationing covers trade in orders too: Superb first, then all orders pro rata
A05	Return cuts from B1 and B2 multiply each channel's own return rate
A06	The 15% trade in failure rate applies equally to every grade
A07	30% of all trade ins, failed or passed, also buy a Tikau phone
A08	From February Superb is graded on Tikau's reading; none changes grade
A09	January is today in every plan; doing nothing repeats today three times
A10	A third shift adds 1,800 sellable phones for ₹9 lakh of growth money a month

ID	Assumption
A11	B2's 4% price rise also raises MegaKart's 12% commission
A12	The ₹120 report and B2 battery costs apply to trade in buyers' phones too
A13	Weekly figures use 4.33 weeks a month
A14	The spot check rate (22 of 200) applies to every Good phone sold
A15	April brings new growth money; trade in ramps 1,000, 1,800, then +800 a month
A16	Stress tests move only what Tikau does not control, 25% worse or better
A17	The case's ₹139 crore is read as selling price before commission
A18	August to October averages stand for November to January
A19	Store, creator and MegaKart return multipliers hold under B1 and B2
A20	Only traded phones that pass save 8%; failed ones go for parts at cost

Source: case Exhibits 2 to 4, page 3 | team model 9b3628d94d (T1 to T6) | rerun: python -X utf8 marksoc-case/model/dobaara_model.py

A2. Orders rise 16.6% and returns fall to 56% of today's rate under B1 and B2, the lab caps at 9,000, and March stays above zero down to a 10.5% order rise

HOW THE OPTIONS COMBINE (EXHIBIT 6 RULES)

Effect	Working
Orders	1.08 × 1.08 = 1.1664, so +16.6% in every channel
Returns	0.70 × 0.80 = 0.56 of each channel's rate; March 4.55%
Superb rationing	demand 2,070 against 2,000: 70 orders (3.4%) lost
Lab	sold 8,328 of 9,000 with the third shift (93%)
Prices	Superb ₹24,960, Good ₹16,640, Fair ₹10,000
Batteries	Good 40% x ₹1,000 = ₹400; Fair 70% x ₹800 = ₹560
Claims	Superb 4%, Good 6%, Fair 9% at ₹2,500
Growth money	Jan ₹40.0 (B1 ₹15, B2 ₹25); Feb ₹9.0; Mar ₹9.0 lakh

CONTRIBUTION PER PHONE UNDER EACH OPTION, ₹

Option	Superb	Good	Fair
Today	₹4,653	₹2,524	₹716
A	₹4,653	₹2,524	₹416
B1	₹4,555	₹2,442	₹666
B2	₹5,602	₹2,789	₹228
B1 + B2	₹5,500	₹2,699	₹164
A + B1 + B2	₹5,500	₹2,699	−₹136

Read: B1 and B2 together add ₹847 to a Superb phone and ₹175 to a Good one, but cut a Fair phone to ₹164. With A on top a Fair phone loses money.

CHANNELS IN MARCH UNDER OUR PLAN

Channel	Phones	After mkt, ₹ lakh	Per order	Returns
Paid ads	3,012	7.0	₹231	4.9%
MegaKart	2,325	2.1	₹92	5.3%
Creators	1,035	18.3	₹1,769	5.4%
Stores	1,149	21.6	₹1,881	1.8%
Referrals	807	23.6	₹2,923	3.9%

MegaKart earns ₹92 an order in March: its 12% fee grows with the 4% price rise and its mix leans to Fair. We add no MegaKart spend.

BREAK-EVEN POINTS FOR MARCH

Input	Plan	Zero at
Order rise from B1, B2	+16.6%	+10.5%
Orders a week	1,923	1,838
Good battery swaps	40%	55%
Fair battery swaps	70%	97%
Returns kept	56%	74%

Returns kept: the share of today's return rate left after B1 and B2; at 74% March returns reach the 6.0% limit.

SHORT FORMS

Short	Meaning
A to C	the case's options
IMEI	a phone's identity number
Q1	January to March 2027
After mkt	contribution after marketing
Fee	MegaKart's 12% commission
₹ lakh	₹1,00,000
x	multiplied by

Source: case Exhibit 6 rules | team model 9b3628d94d (T11, T13, T17, T21) | short forms used in the deck sit bottom right

THANK YOU

THEREFORE

Tikau should certify every phone, promise 85% battery and 12 months, open a third lab shift on 1 February and sell to family buyers. March EBITDA moves from −₹14.1 lakh to +₹5.6 lakh on ₹58.0 lakh of growth money, with every board test passed.

March EBITDA +₹5.6 lakh	Return rate 4.5%, limit 6.0%	₹58.0 of ₹80 lakh spent
