Tikau's problem is trust behind a full lab, not demand: 91.6% of product-page visitors leave, battery fear outranks price two to one and the lab sells every phone it can test

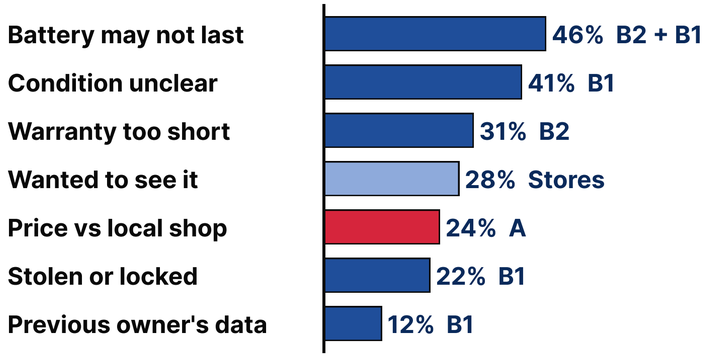

WEBSITE FUNNEL, OCTOBER 2026

91.6% leave the phone page without adding to cart

Step	People	Conv.
Visited	9,60,000	
Opened a page	3,10,000	32.3%
Added to cart	26,000	8.4%
Ordered	4,200	16.2%
Store pickup	n/a	33%

WHY 1,500 VISITORS DID NOT BUY, %

More than one answer allowed. Trust fills 5 of the 7 reasons; price comes fifth. The tag after each bar is the option that answers it.

WHAT WOULD MAKE THEM BUY, %

	Share	Fixed by
85% battery promise	44%	B2
12 month warranty	39%	B2
Photos, battery, IMEI	36%	B1
Old phone in part	31%	C
A price 5% lower	22%	A

Two to one: a battery promise draws 44% of those who left; a 5% price cut draws 22%.

DEMAND IS NOT THE LIMIT: THE LAB IS FULL

Lab: sellable phones a month

7,200 of 7,200

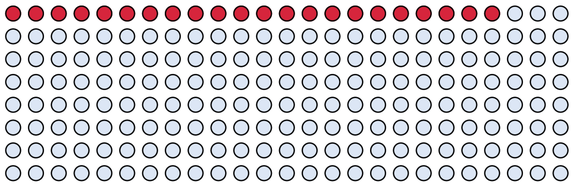

Superb phones from traders a month

1,775 of 2,000

8,000 tested, 10% fail, 7,200 sellable, all sold. Any extra order needs a third shift; without one the case's rule drops it.

BATTERY CLAIMS FAIL ON 11% OF GOOD

22 of 200 Good phones read below the 80% on their listing in Tikau's own November check: about 351 Good phones a month (A14). Exhibit 5 needs Tikau's own lab reading, so test 4 fails today.

FIVE WHYS TO ONE ROOT CAUSE

Why	Finding
1 Loss	claims and returns cost ₹22.2 lakh a month
2 Returns	buyers doubt battery (46%) and condition (41%)
3 Doubt	battery figures come from the trader's tool
4 Tool	the lab runs at 7,200 of 7,200, no spare time
5 Root	Tikau sells what it cannot yet prove
