Customer Personas

The Casual Listener

- **Age**: 36
- **Need**: Easy access to podcasts for commutes in their car, occasionally in traffic.
- **Pain**: Frustrated by complex navigation and content overload.
- **Preference**: Prefers music-inspired, mood-based podcast recommendations.

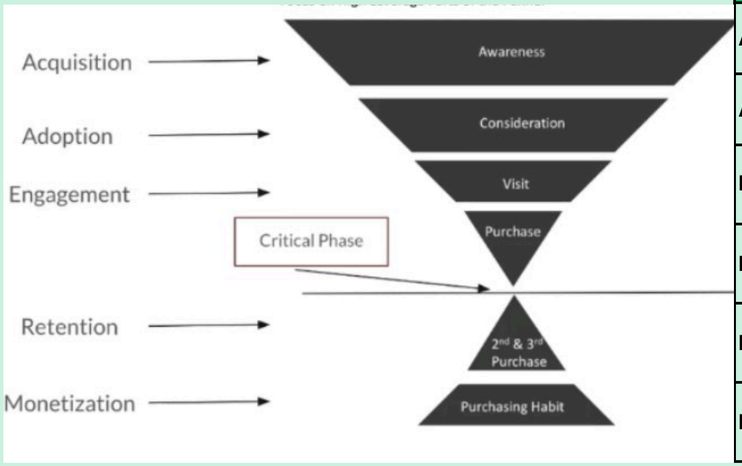

The Hardcore Fan

- **Age**: 25
- **Need**: Deep dive into niche podcast genres and exclusive content.
- **Pain**: Overwhelmed by repetitive recommendations and lack of discovery tools.
- **Preference**: Seeks highly personalized, AI-driven content suggestions and gamification rewards.

The Messy Listener

- **Age**: 20
- **Need**: Access to diverse podcasts across various interests, with easy navigation.
- **Pain**: Struggles with managing downloaded content; navigating bw music & podcasts.
- **Preference**: Desires better organization features and simplified offline content management.

User Journey

Stage	User Pain Points	Empathy	Possible Solutions
Acquisition	Low awareness of podcasts, cluttered UI	😐	**Simplify UI**, integrate podcasts in onboarding tutorials
Adoption	Complex & confusing navigation, discovery tools	😵	**Voice Assistant Search**, **Gamification** with Music and Podcast
Engagement (Visit)	Overemphasis on popular content, content overload	🙂	**AI Search** for diverse content, **Short Content** to build habits
Engagement (Purchase)	Lack of effective social sharing features, desire for more tailored recommendations	🙂	**Share 10-20 sec clips**, Gamification features
Retention	No Mood based option, Popularity Bias, Can't find right podcast	😞	**Mood-based podcasts**, adjustable personalization with **AI search**
Monetization (Habit)	Building consistent listening habits, maximizing value from subscriptions	🙂	**Gamification**: Streaks, Badges, Score, habit-building features like daily rewards

Strengths

Brand Level

- Extensive global user base and **experience** across diverse markets.
- Recognized and **trusted** for innovation and **quality** in streaming
- Highly **personalized** user engagement across both music and podcasts

Product Level

- Comprehensive and **diverse range** of podcast genres.
- **Smooth integration** of music and podcast streaming.
- **Effective algorithm**-driven podcast recommendations.

R.I.C.E. Prioritization

Solution	Description	Reach (0-10)	Impact (0-5)	Confidence (0-10)	Effort (0-10)	RICE Score	Ranking
AI Search	AI Search option for user **preference** acc. to explanation	9	5	8	7	51	**2**
Mood Based Podcast	Mood-based podcast **integrated with songs** with **just one click**	7	4	8	6	37	**3**
Gamification (integrate podcasts and songs)	Listen to podcasts for 15min **get 1 ad waived off**	7	4	7	6	32	**4**
Gamification for Habit	Streaks, Badges, Your Score	7	3	8	7	24	6
Short Content (Clips)	To make habit and keep users hooked	8	5	7	5	56	**1**
Voice Assistant Search	**Hands-free** feature	6	3	7	6	21	7
Sharing quick Clips	Sharing 10-20 sec short clip of podcasts with friends	7	3	7	5	29	5

AI Search (Voice + Type)

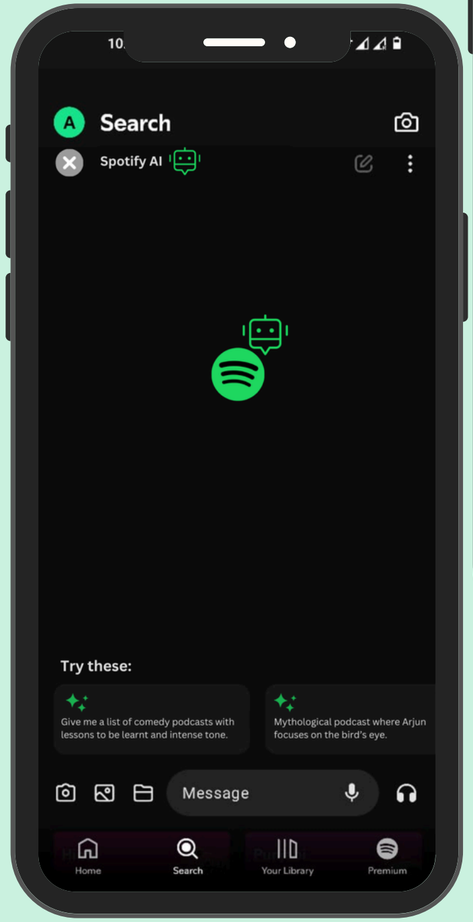

Simplifies podcast discovery with personalized AI-driven suggestions based on user input and preferences.

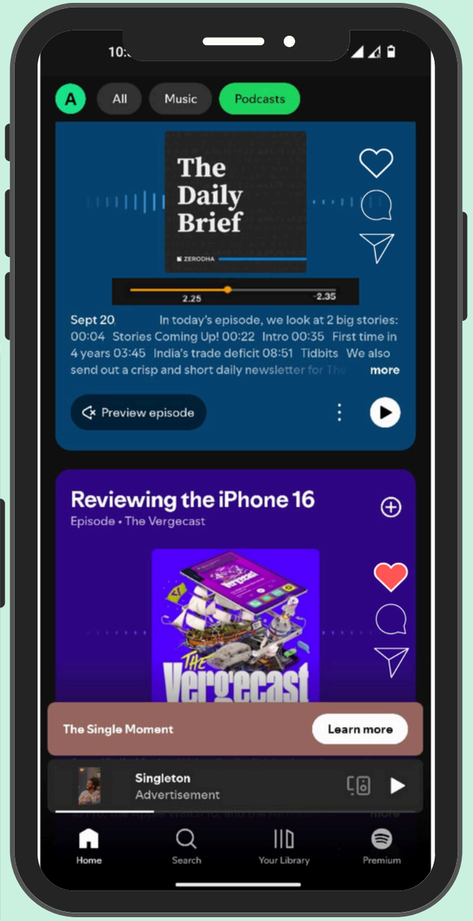

User Input:
User either speaks or types a description of the podcast they want to listen to

AI Analysis: Analyze input + listening history.

Podcast Matching: Curate a personalized list.

Display Recommendations: Show tailored podcast options.

Shorter Content (Clips)

Addressing lower attention spans, this solution focuses on creating and promoting short, easily searchable content to drive higher engagement and habit formation.

Content Creation: Develop shorter podcast episodes from existing / original.

Search Integration: Enhance search to easily find short content (with **AI**).

User Engagement: Promote short content to boost engagement.

Habit Formation: Use frequent short content to build user habits.

Figma Wireframes

Mood-based Podcast - Music Integration

This feature seamlessly integrates mood-based podcast recommendations with music, offering users podcast suggestions that align with the emotional tone of their current song, enhancing the listening experience.

Music Detection: Analyze the lyrics, mood, and tone of the currently playing song.

↓

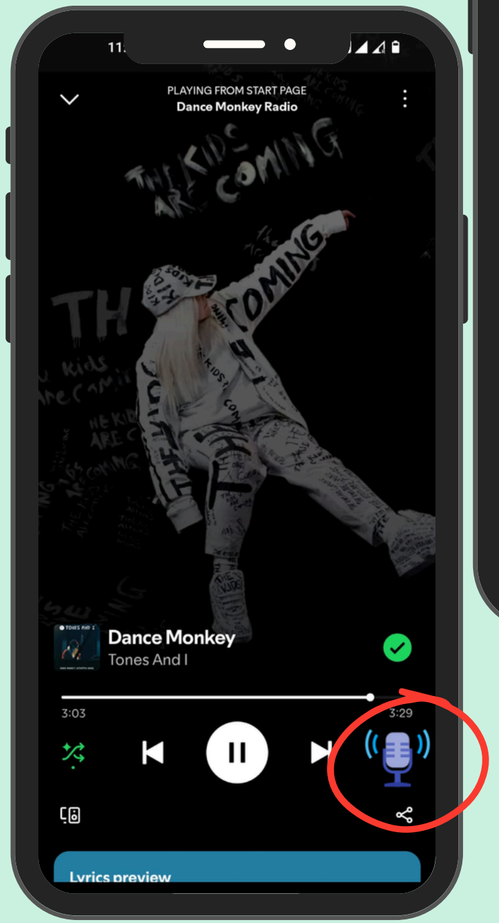

Podcast Matching: Identify podcasts with a similar mood or theme.

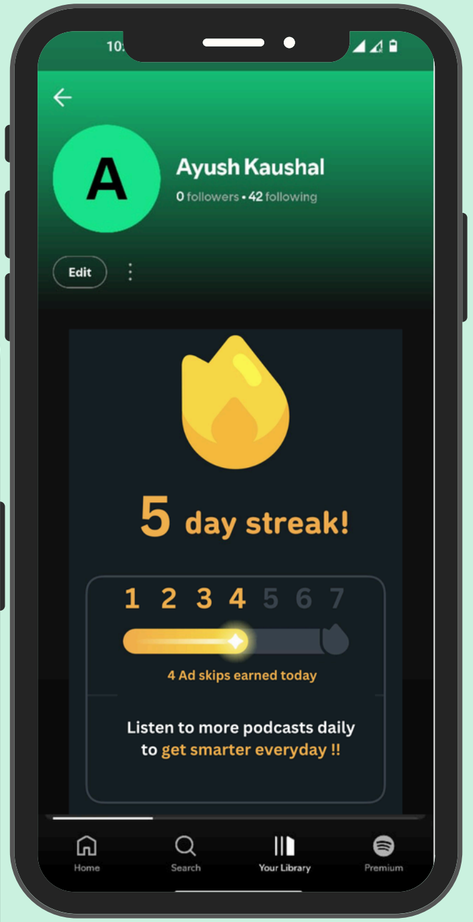

↓

One-Click Suggestion: User clicks the "Similar Podcast" button.

↓

Display Recommendations: Show tailored podcast options.

Daily Gamification

This gamification strategy boosts podcast exploration and daily engagement by offering ad-free music rewards for consistent podcast listening, fostering habit formation and increased user interaction.

Listen & Earn: Listen to 15 minutes or complete a podcast episode

↓

For Free users

Ad Removal Reward: Unlock 1 ad-free music session daily (as many)

↓

Explore Podcasts: Encourage exploration with this incentive.

↓

For Premium users

Build Streaks: Daily listening streaks lead to more rewards. Your Score, friends score, badges and honours.

Success Metrics

North Star Metric

Supporting Metrics

AI Search (Voice + Type)

- Users Utilizing AI Search
- Daily Active Users (DAUs)
- Monthly Active Users (MAUs)
- CTR for podcast suggestions
- Net Promoter Score (NPS)

Shorter Content (Clips)

- Engagement Rate (likes, shares, etc.)
- Frequency of short content searches
- DAUs engaging with short content
- Redirections to full podcasts
- Customer Satisfaction (CSAT) score

Mood-based Podcast - Music Integration

- Click Through Rate (CTR)
- Utilization of "Similar Podcast" feature
- Increase in podcast listens after music
- Engagement with mood-podcasts
- Retention rate using both features

Daily Gamification

- Daily Active Users (DAU)
- Average listening time per user
- Engagement with *both podcasts and music daily*
- Podcast completions to ad-free music
- Frequency of daily streaks maintained

Go-To Market Strategy

1 Awareness & Initial Rollout

Goal: Drive early adoption of AI Search and Shorter Content.

- Target casual listeners with social media and in-app promotions.
- Collaborate with tech influencers and podcast creators.

2 Engagement & Feature Expansion

Goal: Enhance engagement with Mood-based Podcast Integration.

- Target music lovers with digital ads and in-app notifications.
- Offer premium trials and collaborate with popular artists.

Mood Based Podcasts derived from AI Search in the backend)

3 Gamification & Daily Engagement

Goal: Boost daily engagement through gamification.

- Target active listeners with in-app gamification features.
- Promote engagement with social media challenges and rewards.

4 Full Scale & Optimization

Goal: Optimize features and gather continuous user feedback.

- Engage all user segments with regular updates and A/B testing.
- Launch rewards program and continue influencer collaborations.

Expected ROI

Solution	Initial Development Cost (INR)	Projected ROI	Engagement Increase
AI Search (Voice + Type)	₹40,00,000 - ₹1,50,00,000	+30% revenue from usage increase	+20% user interactions
Shorter Content	₹12,00,000 - ₹40,00,000	+15% revenue from ads & subscriptions	+20% daily active users
Mood-based Podcast - Music Integration	₹8,00,000 - ₹32,00,000	+20% session time increase	+15% retention rate
Gamification	₹20,00,000 - ₹60,00,000	+20% revenue from reduced churn	+10% daily engagement
