

Nestlē®

&

Nestle 4Ps Challenge

Nestlé CERELAC GROW

Problems Identified

Lack of Awareness
Mothers lack awareness about nutrient requirements for kids

Different concept of nutrition
Different beliefs about concept of nutrition

Impact of traditional influencers
Mothers and relatives are key influencers

Methodology Followed

26 Personal Interviews with **mothers** of kids **aged 2-5 years**

33 telephonic interviews with mothers

Interaction with **4 pediatricians** and **2 nutritionists**

Secondary research through published journals and articles

What different mothers think?

Striving Moms
Young, diverse moms with success aspirations, connected to internet always

Conventional Moms
Family and faith come first for them, they are not much willing to experiment, mainly watch television

Mavericks Moms
Unconventional, prefer organic and natural foods, use less technology

Alpha Moms
Highly active socially, early adopters, heavy users of social media and brand followers

Modest Moms
Similar to conventional moms, family and faith-oriented, but are more willing to experiment and use digital

Influencers for Moms

Pediatricians and nutritionists

Family members and relatives

Online E-commerce websites

Parenting blogs, Social Media and WhatsApp groups

Barriers to Consumption

Triggers to Consumption

Importance of Balanced Diet

- Adequate nutrients in the form of Proteins, Carbohydrates, Vitamins , Minerals and Starch is required for healthy growth of a child
- Home made food do not always fulfil the requisite quota of nutrition requirement in a growing kid

Tasty Alternatives for Fussy Eaters

- Picky eaters need tasty food to keep them interested in eating regularly
- Pediatricians suggest that for such eaters easily digestible, tasty supplements with smooth texture can be given

Convenience Factor for Working Mothers

- Working mothers do not get sufficient time to spend with their toddlers
- They can't afford to spend even the time they get out of office in preparing food

Opportunities Identified

Awareness

Awareness about nutrient dense foods is minimal among many mothers and belief that home cooked food fulfils the nutrition need

Penetration

Rising internet and social media penetration among Indians in general and women in particular making information dissemination easier

Competition

Lack of presence of any competitor in the category ensuring identification of need space and capturing market share by owning unowned benefits

Key Insights

- **Home made food doesn't always translate to nutritious food** and there is a need to bridge the nutrition gap among growing kids
- The **requirement of nutrition among growing kids is more** than that in adults but they can only eat limited quantity of food due to small tummies
- There is a **need to counter the belief** that processed nutrient dense food might lead to the toddler to grow into an irresponsible eater

Nestle CEREGROW

Social Media Consumption (from consumer survey)

95% mothers surveyed used **WhatsApp** as primary messaging tool

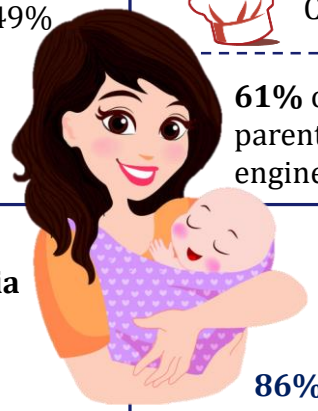

Social Media Accounts Mums Have

94% | 56% | 49%

Top 3 topics moms are reading online:

- Parenting tips **76%**
- Health and nutrition tips **75%**
- Cooking and baking tips **66%**

Digital Media Strategy

1 Audience
Digital campaigns will focus on the target group of mothers and their influencers

2 Content
The content will focus on creating awareness and increased number of trials

3 Channels
Content will be put on Facebook, Instagram, blogs on parenting websites

Objectives	Key Performance Indicators
Awareness about nutrient dense food	Views, unique users, awareness lift, watch time, ad recall lift
Generate trials and adoption	Favorability Lift, brand interest lift, clicks, sales and signups
Influence reviews and brand equity	Blogs mention, brand interest, e-commerce website reviews, social media queries

Digital Media Strategies

Facebook Engagement

Engagement through Blogs

Articles by expert bloggers and pediatricians on nutrition requirements of a growing toddler and the importance of supplements for small tummies

Experience of being a Mother

Videos by mothers on Facebook Ceregrow page on the change they observed before and post feeding Ceregrow to their toddlers

Awareness through YouTube series

Link of YouTube Pediatricians series will be shared on Facebook page to increase the number of subscribers on YouTube channel as well

Instagram Photo Contest

3-pillars of Ceregrow:
- Growth
- IQ
- Health

Photography contest in Instagram depicting 3-pillars of Ceregrow with mothers sending their entries; 1st 10 entries win hampers and coupons which can be redeemed online.

YouTube Ceregrow Channel

The channel would cover a 6 week educational series, Samhita, by leading Paediatricians on healthy and nutritious food requirements for small tummies

Recipe shows will be uploaded on the channel on a regular basis by professional chefs exploring various recipes that can be made using Ceregrow

Twitter Hashtag Campaign

#YummyMummyOfTheMonth

Mothers upload photographs of their recipes with #MummysYummyCeregrowRecipe and the best recipe is awarded Mom of the Month by Nestle

#CeregrowKidoftheWeek

Mothers send the videos of their kids at their most energetic mode to Nestle and the whackiest kid goes online on Twitter and the toddler crowned "Ceregrow Kid of the Week"
